

My Expenses

User guide — install & every screen

App link (tap to open)

<https://1lev1user.github.io/coursor-small-app/>

Local-only euro tracker for income and spending. No account and no cloud sync — everything stays on this device. Not an App Store / Google Play download: open the link in the right browser, then add it to your Home Screen.

Developed by Ļevs Krilovs. Share the app and this guide only with his permission.

1. Install on iPhone / iPad (Safari)

Use Safari only. Chrome and in-app browsers (Telegram, WhatsApp) usually hide “Add to Home Screen”.

iPhone step: tap Share

Step A — Share

What you see

- Safari address bar and toolbar at the bottom.
- The square Share icon (arrow pointing up).

What you can do

- Open [the app link](#) — choose Open in Safari if asked.
- Wait until the page loads.
- Tap Share.

Step B — Add to Home Screen

What you see

- The iOS share sheet with app actions.
- The row Add to Home Screen.

What you can do

- Scroll the sheet if needed and tap Add to Home Screen.
- Confirm the name, then tap Add.
- From now on, open the new Home Screen icon (full-screen app).

iPhone step: Share → Add to Home Screen

2. Install on Android (Chrome)

Prefer Google Chrome. Avoid opening the link only inside Telegram or Instagram.

Android step: Chrome menu → Install app

Tap Install app to install this web app on your Android device.
You can also choose Add to Home screen.

Step A — Install from Chrome

What you see

- Chrome's menu (☰) or an Install banner.
- Options like Install app or Add to Home screen.

What you can do

- Open [the app link](#) in Chrome.
- Tap menu ☰ → Install app / Add to Home screen (or the Install banner).
- Confirm Add / Install.

ANDROID: OPEN FROM HOME SCREEN ICON

Android: open from Home Screen icon

Step B — Open the icon

What you see

- A Home Screen or app-drawer icon for My Expenses / Expenses.

What you can do

- Open that icon instead of a browser tab.
- You'll get a full-screen app with offline support after the first load.

3. Computer & new phone

Desktop: Chrome/Edge → [open the link](#) → Install page as app, or bookmark. New phone: on the old device go to Settings → Backup & export → Export JSON; install on the new phone; Settings → Import backup (this replaces all data on that device).

4. What's on each screen

Screenshot on the left · what you see / can do on the right

Open the app: <https://1lev1user.github.io/coursor-small-app/>

Setup Welcome Tell us your name and set your monthly plan once. You can change these later in Settings. Your name Alex Monthly spend budget (EUR) 1000.00 Savings 10 % €100.00 Example: 10% of a €1000 budget pins €100 to Savings. Usual monthly income (EUR) 2000.00 Usual monthly income is counted automatically each month. Later you only add extra income from Home, not this salary again. Continue

Add expense

Category

Choose a category

+

Amount (€)

12.50 or 12,50

Note — what was it?

Optional

Date

09/05/2026

Add expense

Back to Home

[Home](#) [Month](#) [Chart](#) [Settings](#)

Add expense

What you see

- Category picker and optional + to create a flexible category.
- Subcategory when the category has sub-items.
- Amount (euros), optional note (+ can save note as subcategory), and date.
- Add expense button and Back to Home.

What you can do

- Choose (or create) a category and subcategory if needed.
- Enter the amount and optional note, pick the date, then save.
- Use Back to Home when you're done.

Add extra income

Extra income only. Your usual salary from Plan is applied automatically each month — do not enter it again here.

Income category

Amount (€)

100

Date

09/05/2026

Note (optional)

Add extra income

Back to Home

[Home](#) [Month](#) [Chart](#) [Settings](#)

Add extra income

What you see

- Income category picker and + to create a new income category.
- Amount, optional note, and date.
- Reminder that usual salary comes from Settings → Plan.
- Add extra income and Back to Home.

What you can do

- Choose a category or tap + to add one (bonus, gift, freelance...).
- Log one-off income only — not regular salary.
- Save, then return Home — or switch tabs to check Month totals.

My Expenses · User guide · Levs Krilovs · Page 4

Month

Month

What you see

- Month switcher and totals for the selected month.
- Budget left / cash summary vs plan and income.
- Per-category progress (spent vs limit).
- List of expenses (and related entries) for that month.

What you can do

- Move between months to review past spending.
- Spot which categories are over or under plan.
- Open an entry if you need to check details for that month.

Chart

Chart

What you see

- Donut / breakdown of spending by category for the month.
- Category labels or legend tied to the chart.

What you can do

- See which areas take most of the budget at a glance.
- Compare months after you switch the month elsewhere if available.

Settings

What you see

- Jump links: Plan · Income · Subscriptions · Categories · Backup.
- Plan block for your name, monthly spend budget, and usual income.
- Subscriptions: budget share + recurring list (day of month).
- Categories editor (Savings is protected) and Backup & export.

What you can do

- Edit Plan (name, budget / usual income — 0 allowed).
- Manage extra-income categories and subscription reminders.
- Tune category limits (% or €); Savings stays fixed and $\leq 100\%$ of budget.
- Export / import JSON backup, or export a month CSV.

5. Who this is for

Personal use for people who receive access from Лєvs Krilovs. Local-only euro tracker — no account, no cloud sync. Developed by Лєvs Krilovs; share only with his permission.
