

My Expenses

Illustrated user guide — install & screens

App link (tap to open)

<https://1lev1user.github.io/coursor-small-app/>

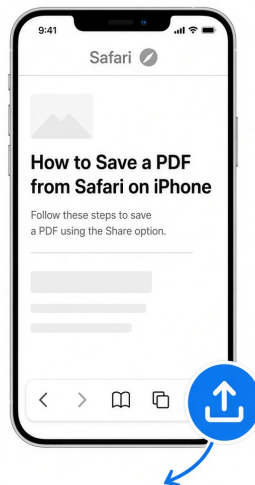

Not an App Store / Google Play download. Open the link in the correct browser, then add it to your Home Screen. Photos of the real app and install steps are below.

Developed by Ļēvs Krilovs. Share the app and this guide only with his permission.

1. Install on iPhone / iPad (Safari)

Use Safari only. Chrome / Telegram / WhatsApp in-app browsers usually hide “Add to Home Screen”.

- 1. Open [the app link](#) — if needed, choose Open in Safari.
- 2. Wait until the page loads.
- 3–4. Tap Share, then Add to Home Screen → Add.
- 5. Open the new Home Screen icon from now on (full-screen app).

iPhone step: tap Share

Illustration: tap Share in Safari

iPhone step: Share → Add to Home Screen

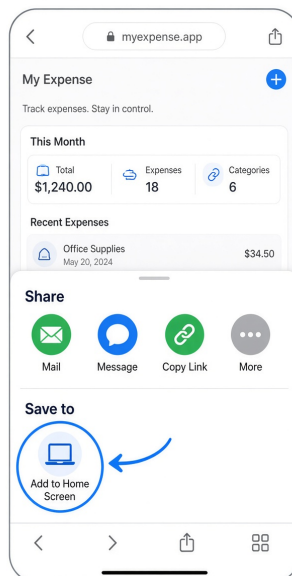

Illustration: choose Add to Home Screen

2. Install on Android (Chrome)

Prefer Google Chrome. Avoid opening the link only inside Telegram / Instagram.

- 1. Open [the app link](#) in Chrome.
- 2. Tap menu ☰ → Install app or Add to Home screen (or use the Install banner if shown).
- 3. Confirm Add / Install.
- 4. Open My Expenses / Expenses from the Home Screen or app drawer.

Android step: Chrome menu → Install app

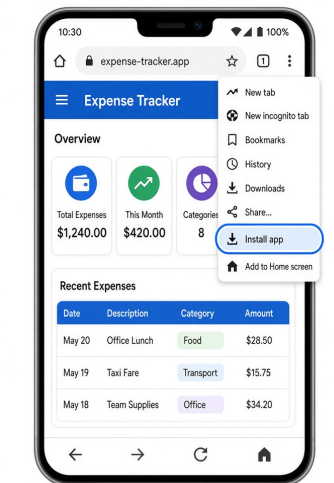

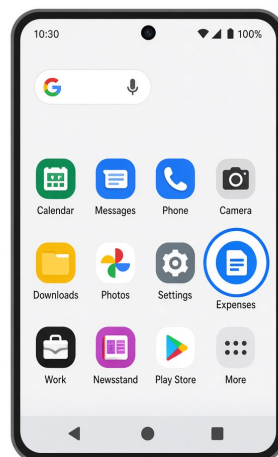

Illustration: Chrome menu → Install app

ANDROID: OPEN FROM HOME SCREEN ICON

Android: open from Home Screen icon

Illustration: open the Home Screen icon afterward

3. Computer & new phone

Desktop: Chrome/Edge → [open the link](#) → Install page as app, or bookmark. New phone: Settings → Backup & export → Export JSON on the old device; install on the new phone; Settings → Import backup (replaces all data).

4. What's on each screen

Settings

Screenshot: Add (first tab)

- Category + + — pick a category or create a new flexible one.
- Subcategory — appears when the category has sub-items.
- Amount — expense in euros.
- Note + + — optional text; + can save the note as a subcategory.
- Date and Add expense — save the entry on this device.
- Bottom tabs: Add · Month · Chart · Settings.

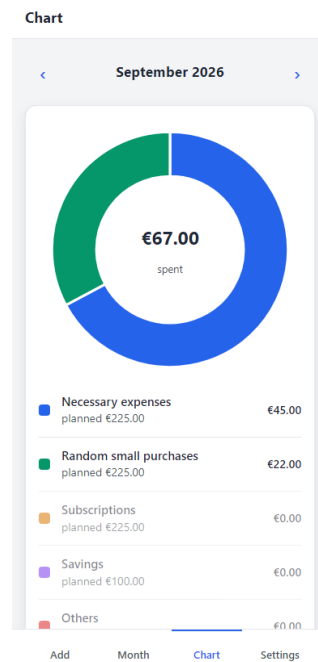

Month

Screenshot: Month

- Month navigation and totals for the selected month.
- Budget left / cash summary vs your plan and income.
- Per-category progress (spent vs limit).
- List of expenses (and related entries) for that month.

Chart

Screenshot: Chart

- Donut / breakdown of spending by category for the month.
- Use it to see which areas take most of the budget.

Settings (formerly More)

Screenshot: Settings (formerly More)

- Jump links: Plan · Income · Subscriptions · Categories · Backup.
- Plan — monthly spend budget and usual income (0 allowed).
- Income — extra income entries and income categories.
- Subscriptions — budget share + recurring list (day of month).
- Categories — edit plans (flexible/fixed, %/€), Savings, subcategories.
- Backup & export — JSON backup import/export and month CSV.

5. Who this is for

Personal use for people who receive access from Ļevs Krilovs. Local-only euro tracker — no account, no cloud sync. Developed by Ļevs Krilovs; share only with his permission.
