

My Expenses

User guide - install & every screen

App link (tap to open)

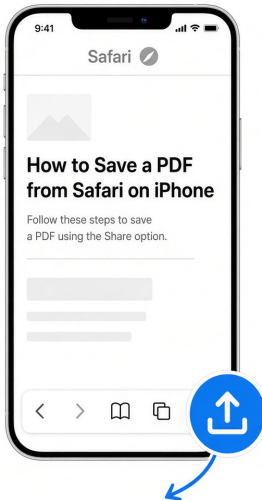

<https://1lev1user.github.io/coursor-small-app/>

Local-only euro tracker for income and spending. No account and no cloud sync - everything stays on this device. Not an App Store / Google Play download: open the link in the right browser, then add it to your Home Screen.

Developed by Ļēvs Krilovs. Share the app and this guide only with his permission.

1. Install on iPhone / iPad (Safari)

Use Safari only. Chrome and in-app browsers (Telegram, WhatsApp) usually hide “Add to Home Screen”.

iPhone step: tap Share

Step A - Share

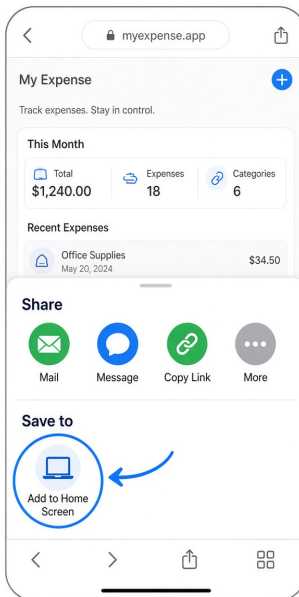

What you see

- Safari address bar and toolbar at the bottom.
- The square Share icon (arrow pointing up).

What you can do

- Open [the app link](#) - choose Open in Safari if asked.
- Wait until the page loads.
- Tap Share.

iPhone step: Share → Add to Home Screen

Step B - Add to Home Screen

What you see

- The iOS share sheet with app actions.
- The row Add to Home Screen.

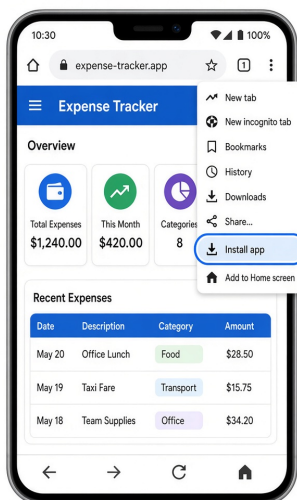

What you can do

- Scroll the sheet if needed and tap Add to Home Screen.
- Confirm the name, then tap Add.
- From now on, open the new Home Screen icon (full-screen app).

2. Install on Android (Chrome)

Prefer Google Chrome. Avoid opening the link only inside Telegram or Instagram.

Android step: Chrome menu → Install app

✓ Tap Install app to install this web app on your Android device.
You can also choose Add to Home screen.

Step A - Install from Chrome

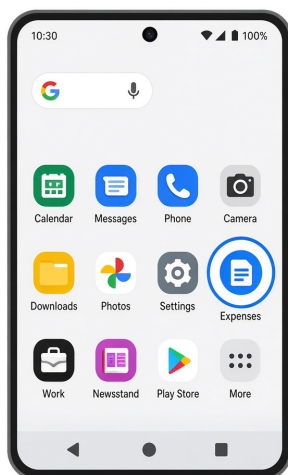

What you see

- Chrome's menu (⋮) or an Install banner.
- Options like Install app or Add to Home screen.

What you can do

- Open [the app link](#) in Chrome.
- Tap menu ⋮ → Install app / Add to Home screen (or the Install banner).
- Confirm Add / Install.

ANDROID: OPEN FROM HOME SCREEN ICON

Android: open from Home Screen icon

Step B - Open the icon

What you see

- A Home Screen or app-drawer icon for My Expenses / Expenses.

What you can do

- Open that icon instead of a browser tab.
- You'll get a full-screen app with offline support after the first load.

3. Computer & new phone

Desktop: Chrome/Edge → [open the link](#) → Install page as app, or bookmark. New phone: on the old device go to Settings → Backup & export → Export JSON; install on the new phone; Settings → Import backup (this replaces all data on that device).

4. What's on each screen

Screenshot on the left · what you see / can do on the right

Open the app: <https://1lev1user.github.io/coursor-small-app/>

Setup

Welcome

Tell us your name and set your monthly plan once. You can change these later in Settings.

Your name

Alex

Monthly spend budget (EUR)

1000.00

Savings

10 %

€100.00

Example: 10% of a €1000 budget pins €100 to Savings.

Usual monthly income (EUR)

2000.00

Usual monthly income is counted automatically each month. Later you only add extra income from Home, not this salary again.

Continue

First-run setup

What you see

- Your name - used to personalise Home.
- Monthly spend budget field (euros; 0 allowed).
- Savings as € or % of that budget.
- Usual monthly income field (euros; 0 allowed).
- A continue / save control at the bottom.

What you can do

- Enter your name (you can change it later in Settings → Plan).
- Enter how much you plan to spend each month.
- Set Savings (0 is fine; cannot go over 100% of the budget).
- Enter usual income - counted automatically every month later.
- Save to open the app.

Home

Alex's September

left to spend

€933.00

€67.00 spent of €1,000.00

Add expense Add income

Salary and subscriptions are added for you. Everything stays on this device.

Recent

Soap Random small purchases	€22.00 3 Sep
Market Necessary expenses	€45.00 2 Sep
Salary Income	+€500.00 1 Sep

Open Month

Home Month Chart Settings

Home (first tab)

What you see

- Your month with your name (for example Alex's September).
- Green block: how much of this month's spend budget is left.
- Add expense (main button) and Add income.
- Your three latest entries, and Open Month for the full list.
- Bottom tabs: Home · Month · Chart · Settings.

What you can do

- Tap Add expense for day-to-day spending.
- Tap Add income for a bonus, gift or side job. Your salary is added automatically.
- Change your name anytime in Settings → Plan.
- Use Month / Chart / Settings tabs for overview and setup.

Add expense

Category

Choose a category ▼ +

Amount (€)

12.50 or 12,50

Note (what was it?)

Optional

Date

09/25/2026 📅

Add expense

Back to Home

• Home Month Chart Settings

Add expense

What you see

- Category picker and optional + to create a flexible category.
- Subcategory when the category has sub-items.
- Amount (euros), optional note (+ can save note as subcategory), and date.
- Add expense button and Back to Home.

What you can do

- Choose (or create) a category and subcategory if needed.
- Enter the amount and optional note, pick the date, then save.
- Use Back to Home when you're done.

Add extra income

Extra income only, such as a bonus or a gift. Your salary is added automatically each month.

Income category

Choose a category ▼ +

Amount (€)

100

Date

09/25/2026 📅

Note (optional)

Add extra income

Back to Home

• Home Month Chart Settings

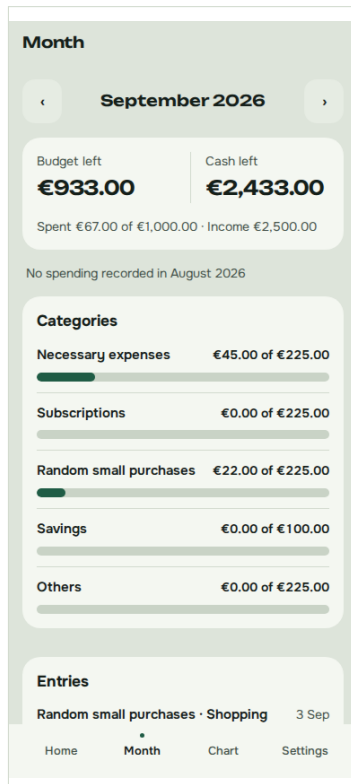

Add extra income

What you see

- Income category picker and + to create a new income category.
- Amount, optional note, and date.
- Reminder that usual salary comes from Settings → Plan.
- Add extra income and Back to Home.

What you can do

- Choose a category or tap + to add one (bonus, gift, freelance...).
- Log one-off income only - not regular salary.
- Save, then return Home - or switch tabs to check Month totals.

Month

What you see

- Month switcher and totals for the selected month.
- Budget left / cash summary vs plan and income.
- Per-category progress (spent vs limit).
- List of expenses (and related entries) for that month.

What you can do

- Move between months to review past spending.
- Spot which categories are over or under plan.
- Open an entry if you need to check details for that month.

Chart

What you see

- Two analytics: Spending and Income.
- Spending donut by expense category (tap a row to drill into subcategories).
- Income donut: usual salary from Plan + extra income by category.
- Note: spend budget stays fixed - extra income only raises Cash left.

What you can do

- Compare which expense areas take most of the budget.
- See where money came from this month (Plan salary vs extras).
- Switch months with the month navigator at the top.

Settings

What you see

- Jump links: Plan · Income · Subscriptions · Categories · Backup.
- Plan block for your name, monthly spend budget, and usual income.
- Subscriptions: budget share + recurring list (day of month).
- Categories editor (Savings is protected) and Backup & export.

What you can do

- Edit Plan (name, budget / usual income - 0 allowed).
- Manage extra-income categories and subscription reminders.
- Tune category limits (% or €); Savings stays fixed and $\leq 100\%$ of budget.
- Export / import JSON backup, or export a month CSV.

5. Who this is for

Personal use for people who receive access from Łęvs Krilovs. Local-only euro tracker - no account, no cloud sync. Developed by Łęvs Krilovs; share only with his permission.
